## EXPERIENCE

---

**Seidor** Feb 2025 – Present  
*Tech Lead Marketplace Payments Platform* Spain

- Technical lead of the **AdyenMirakl Connector**, a platform synchronizing marketplace sellers, payments, commissions and financial data between marketplaces and payment providers
- Responsible for architecture decisions, scalability and reliability of a distributed backend platform
- Designed serverless architectures using **AWS Lambda, SQS and PostgreSQL**
- Coordinated development teams and collaborated with international stakeholders
- Participated in **technical proposals and RFC analysis** for new clients
- Supported companies implementing **Stripe payment architectures and integrations**

**Seidor** Jan 2024 – Feb 2025  
*Senior Backend Engineer Adyen Integration Platform* Spain

- Developed core backend services for the **Adyen marketplace integration platform**
- Implemented asynchronous processing pipelines using **AWS SQS**
- Integrated financial workflows including payments, commissions and invoices
- Designed synchronization services between **Adyen and Mirakl APIs**
- Improved system reliability and handling of large financial datasets

**Seidor** Jun 2023 – Jan 2024  
*Senior Backend Engineer SAP Commerce (Automotive Marketplace)* Spain

- Senior developer working on a **vehicle ecommerce marketplace** built with SAP Commerce Cloud
- Developed backend features using **Java and Spring-based SAP Commerce architecture**
- Implemented transactional workflows for vehicle purchasing and financing
- Integrated external financial services and third-party APIs
- Collaborated with distributed teams building digital automotive commerce platforms

**Seidor** Sep 2022 – Jun 2023  
*Backend Developer Marketplace Integrations* Spain

- Developed backend services integrating **Mirakl marketplaces with enterprise systems**
- Built serverless services using **AWS Lambda**
- Implemented proof-of-concept applications for marketplace data synchronization
- Developed automated testing environments and end-to-end testing frameworks

**Capgemini Inditex** Jul 2021 – Sep 2022  
*Software Engineer* Spain

- Member of the **SGA NEXT** team migrating a warehouse management system from monolith to microservices
- Developed backend services using **Java and Spring Boot**
- Implemented a **Kafka-based message router** processing high-volume events
- Processed event streams and stored them in **MongoDB**
- Integrated messaging systems using **IBM MQ**

## EDUCATION

---

**University of Oviedo**  
*Bachelor's Degree in Computer Engineering (Information Technology)* Spain

## CERTIFICATIONS

---

**Stripe Certified Professional Billing Architect**  
**Stripe Certified Professional Implementation Architect**

## SKILLS

---

**Languages:** TypeScript, JavaScript, Java, Python

**Backend:** Node.js, Spring Boot, GraphQL, Microservices

**Cloud:** AWS Lambda, SQS, Serverless architectures

**Databases:** PostgreSQL, MongoDB, MySQL

**Platforms:** Stripe, Adyen, Mirakl, SAP Commerce Cloud
